

Drugs, living things and the problems of standardization

Technische Universität Braunschweig
25 - 27 March 2010

This workshop will focus on the scientific and industrial production as well as on the marketing of 'biologicals', thereby capturing standardization problems and the consumer perspective. We apply a broad definition of biologicals as agents extracted from or generated by biological material. Examples are vaccines and sera, hormones, vitamins, enzymes, macromolecules, bodily fluids and active substances from medicinal plants.

Recent historical work on 20th century pharmacy has mainly focussed on the industrial production of synthetic chemical compounds. Yet, the 'laboratory of nature' – the origin of many new drugs up to the present day – has stayed a point of reference for pharmaceutical practice and for the discussion on drug use, abuse, effects and side effects. The focus of this workshop on 'biologicals' opens up different approaches to thinking about innovation in terms of discourse, production and advertising. The workshop will present recent work in the history of 'biological' drugs.

SCIENCE
FOUNDATION
SETTING SCIENCE AGENDAS FOR EUROPE

Drugs, Living Things and the Problems of Standardization

25 - 27 March 2010

Technische Universität
Braunschweig

Thursday, 25.03.2010

- **15:30 - 16:00**

Welcome by Vice President of TU Braunschweig
Prof. Dr. A. M. Bahadir
Introductory remarks

Panel 1. The Body Politics of Biologicals

- **16:00 - 16:45**

Heiko Stoff (TU Braunschweig)
Wirkstoffe. The Reciprocal Implication of Efficiency and Deficiency in Germany, 1900 - 1950

- **16:45 - 17:30**

Beat Bächli (Universität Bielefeld)
„Cultures of Control“: Coca, Vitamin C, and the Objectivation of Optimisation, 1880 - 1940

17:30 - 18:00: Break

- **18:00 - 18:45**

Sven Bergmann (Humboldt Universität zu Berlin)
Standards, Differences, Analogies in Manipulating Two Sorts of Gametes in the IVF Laboratory

- **18:45 - 19:30**

María Jesús Santesmases (CSIC, Madrid)
Biologicals as Standard Innovators: Practices with Colchicine in Cereals and Human Cells in the 1950s

Friday, 26.03.2010

Panel 2. Producing Nature

- **9:30 - 10:15**

Michael Worboys (Manchester)
'Translating Laboratory Experimental Work into Commercial Scale Production'; Distemper Vaccination, 1926 - 1932

- **10:15 - 11:00**

Jonathan Simon (Université de Lyon)
Local Technique: the Anti-diphtheria Serum in the Lyon Area

11:00 - 11:30: Break

- **11:30 - 12:15**

Pim Huijnen (University of Amsterdam)
The Science of Measuring Vitamins Quality Control and Competition in the Dutch Vitamin Industry before the Second World War

- **12:15 - 13:00**

Lea Haller (ETH Zürich)
Blurred Signs: Cortisone Therapy, Suppressed Symptoms and Untoward Reactions

13:00 - 14:30: Lunch

Panel 3. The Nature of Biologicals

- **14:30 - 15:15**

Axel Helmstädter (Universität Marburg)
Antidiabetic Medicinal Plants between phytotherapy and Lead Structure Research

- **15:15 - 16:00**

Jean Paul Gaudillière (CERMES, Paris)
Biologicals in the Colonies: E. Perrot, Medicinal Plants and the Industrial Re-ordering of Pharmacy

16:00 - 16:30: Break

- **16:30 - 17:15**

Alexander von Schwerin (IFK Wien/TU Braunschweig)
„Natural“ Low Doses: the Case of Radium Therapy

- **17:15 - 18:00**

Hans Ebberts (Utrecht University)
Challenges in Standardizing Safety Assessments of Biopharma-ceuticals, the Case of EPREXAssociated Pure Red Cell Aplasia

Saturday, 27.03.2010

Panel 4. The Making of (Contested) Biologicals

- **9:00 - 9:45**

Sophie Chauveau (Lyon II et LARHRA)
Human Tissues and Organs: Collection, Uses, Standardization and „Commodification“ of Human Body

- **9:45 - 10:30**

Teresa Ortiz-Gómez, Agata Ignaciuk (Universidad de Granada)
The Debate on Oral Contraception in 1970's Spain: Media, doctors, and feminists

10:45 - 11:00: Break

- **11:00 - 11:45**

Marion A. Hulverscheidt (Charité Universitätsmedizin Berlin)
Smallpox Vaccine Production – Industrial Calves and the Fear of German Public, 1920 - 1965

11:45 - 12:15: Lunch

- **12:15 - 13:00**

Ulrike Thoms (Charité Universitätsmedizin Berlin)
Insulin, the Patient and the Limits of Standardization, 1923 - 1980

- **13:00 - 14:30**

Commentary by Axel Hüntelmann (Universität Bielefeld) and Christoph Gradmann (Universitet I Oslo) followed by concluding discussion
